Adam Hudson
Adam's Computers
1115 E. Broadway
Princeton, IN 47670

RE: Testimonial

Several years ago I met Adam of Adam's Computers when I headed the Gibson County Chamber of Commerce. I used Adam to fix the outdated computer networking equipment, computer hardware and telephone system. We spent several years as our budget allowed to perfect all the computer and telecommunications systems in the building. Now as I lead the Gibson County Economic Development Corporation I have sought out the council of Adam and his team at Adam's Computers for the same reasons at our 100 plus year old building GCEDC purchased for our corporate offices on the square in Princeton. In the next 24 - 36 months we will transform the building into a small business incubator, computer lab and GCEDC's corporate offices. I have already contract Adam and his team to take our building from the 19th century to the 21st century. We will be utilizing technology for video conferencing, our corporate computers, computer networking and hardware for our computer lab, security surveillance, and graphic design. Yes, Adam's Computers now offers computer graphics and I have already utilized their services for signage and other graphic design needs.

I am 100% satisfied with the service, quality of work, and professionalism provided by the entire team at Adam's Computers.

B. Todd Mosby
President / CEO
Gibson County Economic Development Corporation
